Art Unit: ***1724

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-14, drawn to an apparatus comprising an extractor line, ozone generation means, mixer, and return line, classified in class 210, subclass 198.1.
 - II. Claims 15-17, drawn to a method of treating water to remove bacterial and other impurities therefrom using ozone, classified in class 210, subclass 760.

The inventions are distinct, each from the other because of the following reasons:

Inventions II and I are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the apparatus as claimed can be used to practice a materially different process, such as a process to produce an ozonated beverage.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

A telephone call was made to Mr. Colin Abrahams on June 27, 2002 to request an oral election to the above restriction requirement, but did not result in an election being made.

Art Unit: *** 1724

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
